#### LinkedIn | GitHub

#### Skills

- React.js, Node.js, Express, Javascript, jQuery, REST API, JSON, AJAX
- HTML5, CSS, ES6, Handlebars, Bootstrap, MySql and MongoDB
- Experience with Agile environments such as Scrum

## **Projects**

## Ethr Live App | GitHub

- Ethr was designed to create a community driven video game review site.
- Designed the user login, sessions, cookies, and REST API.
- Worked on the API-routing(front-end and back-end), login, sessions, cookies, handlebars, CSS, and REST API to retrieve and send data to the MySQL database.
- Created by a group of 4 over a span of 10 days.

## Look & Cook Live App | GitHub

- A full-stack MERN interactive food recipe application that allows users to save, search, and create recipes.
- Constructed the API-routing (front-end and back-end), login, sessions, cookies, CSS, image file uploading, and REST API to retrieve and send data to the MongoDB.
- Created by a group of 4 over a span of 7 days.

# **Experience**

#### JUNE 2015- DECEMBER 2017

#### Jamison Services, Inc., Koreatown, Los Angeles- Assistant Property Manager

- Worked directly under the Property Manager to maintain over 1 million sq ft of commercial property.
- Designed a ticket system to create a more fluid and efficient workflow for building maintenance.
  - Created a database to keep track of the status of pending and completed work tickets.
  - Reduced any miscommunication between the office and building maintenance.
- Reduced payroll costs by 25%, increased workflow efficiency, and maintained customer satisfaction.
- Analyzed and troubleshot building related issues to devise a plan to reduce the building turnover rate.
- Scheduled and planned large-scale renovation projects of 20,000 sq ft and above.
  - Responsible for communication between multiple contractors to ensure fluid workflow and to deliver the product in a timely manner.

## Education

MAY 2018 - JULY 2018

#### UCLA Full Stack Web Development Bootcamp, Westwood, Los Angeles - Student

• This 12 week program focuses on teaching students the fundamentals to build full-stack MERN web applications, as well as basic computer science fundamentals and algorithms.

SEPTEMBER 2011 - JUNE 2015

University of California, Riverside, Riverside- B.A., Economics & Admin. Studies
